The AquaSafe® Basement

Guaranteed to stay watertight

The floating show house with a Glatthaar AquaSafe

Cross-section of Glatthaar AquaSafe® Basement

100% waterproof system guaranteed.
Fast, cost efficient quality construction.

AquaSafe® can be combined with other Glatthaar products, e.g. Glatthaar **ThermoSafe®** Basement.

Flooding, rising water tables and poor ground conditions demand a high quality basement construction with extensive knowledge and experience in all aspects of tanking. Basements which are absolutely watertight are required to protect your investment. The Glatthaar **AquaSafe®** system

fulfills this requirement – guaranteed. With the experience of 2,500 basements annually you can rely on Glatthaar for peace of mind.

Our waterproofing system **AquaSafe®** offers 100% protection against the various forms of water penetration/

dampness. This is achieved using our waterproof precast concrete panels and additional tanking of the external joints and walls with our state-of-the-art waterproofing system.

Our basements stay watertight permanently.
