

market leader in basement construction

An aerial photograph of a basement construction site. The concrete walls of several rooms are visible, with various construction materials and tools scattered inside. A large red diagonal graphic element cuts across the image from the top left to the bottom right. In the upper right corner, a yellow crane with 'STEIL' written on its side is partially visible.

## GLATTHAAR BASEMENTS BESPOKE, HIGH-QUALITY BASEMENTS SINCE 1980

NOTE: All images are examples of our services.

**Welcome to Glatthaar Keller!**  
**When it comes to basements, you can rely on us and 40 years of experience!**

Our family business was founded back in 1980 and has since become an award winning market-leading specialist in prefabricated basements and foundations. We deliver over 5.000 basements each year, Europe-wide.

In addition to basement construction, we are also experts in structural calculation, and project management. We guarantee absolute adherence to deadlines, security and quality, every time.

We are continually working on new and innovative solutions, undertaking extensive independent research and product development. We also work alongside several respected institutes and universities on developing the next generation of 'intelligent basements.'

**Founder: Joachim Glatthaar**

**You are our top priority**  
**We are here for you**

As an experienced construction company, we design and build each basement to be 'one of a kind' and completely bespoke. We aim to make the construction process straightforward and stress free, focusing on providing you with exceptional service and a quality product. We'll support you at every stage; from start to finish, and beyond. A personal advisor will be on hand when you need them to answer any questions you have, even after completion.

Our attention to customer services has been recognised and we have achieved several Awards.

**”** *We were supported at every stage by glatthaar's expert project managers and construction team, who helped us immensely with their professionalism and excellent service. In our experience, their customer service is faultless.*

**We create your vision**  
Making your space count

Whatever you intend to use your basement for, the ability to add a full-size floor to your development is something that must be explored. Foundations are needed, so why not go the extra bit and include a basement. You can rest assured that your house will have optimal protection against penetrating moisture. Precast concrete panels and additional tanking of the external joints and walls means that the waterproofing system offers 100% protection against ground water levels. This is a proven and effective barrier against all forms of damp.

Why not see for yourself? We would be happy to welcome you to our headquarters in Schramberg, Southern Germany where we've created a 313-tonne building made of concrete which is able to float in a pool of water almost three meters deep. Visitors are able to get an understanding of how a basement made of precast concrete has been able to remain permanently waterproof for over a decade.

Glatthaar-Innovationsforum in Dunningen-Seedorf

**We deliver on our promise**  
We build your design

We strongly believe that quality matters. As a result, we're committed to creating a superior finished product. We are on hand to provide detailed explanations whenever needed and will help you determine the solution that will best suit your overall needs.

Thinking about building your own basement?  
Contact us now to find out more.

*We think the basement is the best idea we have had. Extending downwards rather than outwards creates living space without reducing the size of the garden.*

**We are your construction partner**

We aim to make the construction process straightforward and stress free, focusing on providing you with an exceptional service and a quality product. We'll support you at every stage, from start to finish, and beyond.

Our practical expertise and specialist on-site experience enables us to construct the best finished product, quickly and efficiently, every time.

*Our experience with Glatthaar Basement has certainly been super positive. They were there for us at all times. They advised and guided us, providing invaluable information.*

**Building is a matter of trust**  
Glatthaar guarantees quality

Quality is our number one priority and we construct our basements with extreme precision in state-of-the-art fabrication facilities.

All Glatthaar prefabricated basements can be built to Passivhaus Standards
